From Research to Application

The Case for Learning and Performance

Course Description

Transform your training department into a center of learning and performance that can directly impact employee on-the-job performance. In this national training program sponsored and broadcast by the National Institute of Corrections, participants will:

- Identify the role of the agency leaders, agency supervisors, trainers, and learners and examine the influence those roles have on performance.
- Explore research on how effective management of lesson content can enhance student learning and performance.
- Explore the importance of providing learners the opportunity to practice new skills and apply new knowledge.
- Discover the effect that practice has on performance.
- Uncover the connections among performance expectations, evaluation, and transfer of learning and how they affect learners.

Criteria for Acceptance Into the Training

Attendees for this training should include:

- Local, state, and federal adult and juvenile correctional leaders from all settings
- Correctional training directors, administrators, coordinators, and instructors
- Curriculum designers, developers, and evaluators
- Staff from colleges and universities with criminal justice programs
- Privatized correctional facilities
